

**NAME**

edit-faxcover – edit faxcover.ps

**SYNOPSIS**

**edit-faxcover** [ *options* ]

**DESCRIPTION**

*edit-faxcover* Edits the 10 header lines of the POSTSCRIPT® cover page document.

**OPTIONS****--with-LINE $x$ =string**

Set variable *LINE $x$*  where  $x$  is 1-10 to be the contents of "string". Warning null strings will not blank out existing lines. Use --with-LINE1=" " to blank out line 1 (actually it'll be a single space)

**--with-FAXCOVER=ARG**

Edit some other faxcover.ps file The faxcover template file can also be specified by setting the FAXCOVER environment variable.

**--help** print this message.

**--nointeractive**

do not prompt for input [INTERACTIVE=no]

**--quiet** do not print messages

**--verbose** opposite of -quiet

**DIAGNOSTICS**

Complaints about not being able to locate/write a template file.

**FILES**

/usr/local/lib/fax/faxcover.ps default cover page template

**BUGS**

null strings will not blank out existing lines.
