NAME

      faxadduser – add a fax user to the permissions file

SYNOPSIS

      /usr/local/sbin/faxadduser [−**a** *admin-password*] [−**f** *permissions file*] [−**h** *host name*] [−**p** *password*] [−**u** *uid*] *username*

DESCRIPTION

      faxadduser creates a new user for HylaFAX services, updating appropriate permission files(see *hosts.hfaxd*(5F)).

OPTIONS

      The following options are available:

      −**a** *admin-password*

             Password for the user to gain admin privileges.

      −**f** *permissions-file*

             Use a permissions file other than the default.

      −**h** *host name*

             Authenticate user from this host only.

      −**p** *password*

             Password for the user to access fax services.

      −**u** *user-id*   User id number for user.
